Subject index

ANALOGUE COMPUTERS AND COMPUTATION

Analogue simulation of a DC brushless drive. E. Dallago and G. Sassone p245

CABLES AND OVERHEAD LINES

Cathodic protection of extended buried conductor networks: a new design method. F. Tosato and S. Quaia p443

CIRCUIT THEORY AND DESIGN

Comparative assessment of zero voltage switched off-line power convertor topologies. W.J.B. Heffernan and P.D. Evans p71
Distortion power in systems with nonsinusoidal voltage. L.S. Czarnecki p276
Pulse multiplication in parallel convertors by multitap control of interphase reactor. M.E. Villablanca and J. Arrillaga p13

CLOSED-LOOP SYSTEMS

Autonomous wind energy conversion system with a simple controller for maximum-power transfer. M. Ermiş, H.B. Ertan, E. Akpınar and F. Ülgüt p421

COMMUTATION

Slotless armature DC machines with multiplex connection. M.N. Hamlaoui and E. Spooner p175

COMPUTER APPLICATIONS

Computer-based optimisation techniques for mass transit railway signalling design. D.C. Gill and C.J. Goodman p261

COMPUTER SIMULATION

Interturn voltages in machine windings evaluated from on-site test results and computer simulation. K.J. Cornick, J.L. Guardado and P. Bekaert p238
Power supply and protection system for plasma stabilisation in the ASDEX Upgrade tokamak. A. Wieczorek, M. Blaumoser, R. Fink, J. Oswald, J. Schwarz and K.H. Vögtle p131

CONTROL EQUIPMENT AND APPLICATIONS

Comparison of two control strategies in development of high-torque electronically commutated drive. T.S. Low, K.W. Lim, M.F. Rahman and K.J. Binns p26

CONTROL SYSTEMS

Observers for field-oriented control of induction motor drives. D.S. Wijesundera and R.D. Jackson p381

CONTROL THEORY

Operating restrictions for third harmonic control of flux in induction machines. G.A. Covic and J.T. Boys p485
Theoretical aspects of control of synchronous reluctance machines. R.E. Betz p355

CONVERTORS

Analysis, design and implementation of the space-vector modulator for forced-commutated cycloconvertors. L. Huber, D. Borojević and N. Burány p103
Calculation of harmonic currents in a three-phase convertor with unbalanced power supply conditions. M. Sakui and H. Fujita p478
Comparative assessment of zero voltage switched off-line power convertor topologies. W.J.B. Heffernan and P.D. Evans p71
Constant frequency, two-stage quasiresonant convertor. K.W.E. Cheng and P.D. Evans p227
Double-output induction generator operating at subsynchronous and supersynchronous speeds: steady-state performance optimisation and wind-energy recovery. I. Çadirci and M. Ermiş p429
Dynamic characteristics of the class E DC/DC convertor using sampled-data modelling. A.J. Forsyth, S.H. Ma and Y.T. Leung p409
Family of saturable reactor assisted soft-switching PWM DC–DC convertors. S. Hamada and M. Nakaoka p395
Modelling and design of a single phase AC to DC convertor. T.-C. Chen and C.-T. Pan p465
New ZVS-PWM inverter switching limits and operating area. M. Metz, J. Roux, S. Ben Doua, J.P. Arches and H. Foch p86
New approach for the analysis of a three-phase induction motor of different ratings connected to a single-phase supply. M.H. El-Maghraby, R.H. Thejel and M.M. Ibrahim p145
Power supply and protection system for plasma stabilisation in the ASDEX Upgrade tokamak. A. Wieczorek, M. Blaumoser, R. Fink, J. Oswald, J. Schwarz and K.H. Vögtle p131
Steady-state analysis of a doubly fed asynchronous machine supplied by a current-controlled cycloconvertor in the rotor. M. Machmoum, R. Le Doeuff, F.M. Sargos and M. Cherkaoui p114
Synthesis of phase-modulated resonant DC/AC inverters and DC/DC convertors. M.K. Kazimierczuk p387

DIODES

Passive input current waveshaping method for three-phase diode rectifiers. A.R. Prasad, P.D. Ziogas and S. Manias p512

EDDY CURRENTS

Analytical computation of AC resistance of round and rectangular litz wire windings. J.A. Ferreira p21

ELECTRICAL MACHINES

'TORUS': A slotless, toroidal-stator, permanent-magnet generator. E. Spooner and B.J. Chalmers p497
Application of EKF to parameter and state estimation of pmsm drive. L. Salvatore and S. Stasi p155
Double-output induction generator operating at subsynchronous and supersynchronous speeds: steady-state performance optimisation and wind-energy recovery. I. Çadirci and M. Ermiş p429

ENERGY CONVERSION AND STORAGE

Autonomous wind energy conversion system with a simple controller for maximum-power transfer. M. Ermiş, H.B. Ertan, E. Akpınar and F. Ülgüt p421
Double-output induction generator operating at subsynchronous and supersynchronous speeds: steady-state performance optimisation and wind-energy recovery. I. Çadirci and M. Ermiş p429

FAULT DETECTION

Calculation and measurement of rail impedances applicable to remote short circuit fault currents. J.C. Brown, J. Allan and B. Mellitt p295
Calculation of remote short circuit fault currents for DC railways. J.C. Brown, J. Allan and B. Mellitt p289

FILTERS AND FILTERING

Co-ordinated three-phase hysteretic-control scheme for active power filtering. P. Doulai and G. Ledwich p457

GENERATORS

'TORUS': A slotless, toroidal-stator, permanent-magnet generator. E. Spooner and B.J. Chalmers p497
Autonomous wind energy conversion system with a simple controller for maximum-power transfer. M. Ermiş, H.B. Ertan, E. Akpınar and F. Ülgüt p421

HYSTERESIS

Co-ordinated three-phase hysteretic-control scheme for active power filtering. P. Doulai and G. Ledwich p457

INDUCTION MOTORS

Control loop study of a load commutated CSI-fed induction motor. J.-H. Song, T.-W. Yoon, K.-H. Kim, K.-B. Kim and M.-J. Youn p183
High-performance speed controller for voltage-source inverter-fed induction motor drives. C.M. Liaw and C.W. Tseng p220
Induction motor parameter estimation algorithm using spectral analysis. H. Chai and P.P. Acarnley p165
Modelling and dynamic performance of variable-frequency-fed induction motors. M.H. Salama and P.G. Holmes p191
New approach for the analysis of a three-phase induction motor of different ratings connected to a single-phase supply. M.H. El-Maghraby, R.H. Thejel and M.M. Ibrahim p145
New model for single-unit representation of induction motor loads, including skin effect, for power system transient stability studies. M. Akbaba and S.Q. Fakhro p521
Observers for field-oriented control of induction motor drives. D.S. Wijesundera and R.D. Jackson p381
Operating restrictions for third harmonic control of flux in induction machines. G.A. Covic and J.T. Boys p485
Practical considerations in the optimisation of induction motor design. C. Singh and D. Sarkar p365
Practical real-time PWM modulators: an assessment. P.G. Handley and J.T. Boys p96

INSULATORS AND INSULATION

Variable-voltage diode convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p197

LIGHTNING AND LIGHTNING PROTECTION

Calculation of the induced effects due to a lightning stroke. S. Cristina and A. Orlandi p374

LINEAR MOTORS

Force-displacement characteristics of linear stepping motors. T. Yokozuka and E. Baba p37

LOAD AND VOLTAGE REGULATION

Pattern recognition applied to transient stability analysis of power systems with modelling including voltage and speed regulation. G. Garcia, J. Bernussou and M. Berbiche p321
Pulse multiplication in parallel convertors by multitap control of interphase reactor. M.E. Villablanca and J. Arrillaga p13

MAGNETIC DEVICES AND PROPERTIES

Analytical computation of AC resistance of round and rectangular litz wire windings. J.A. Ferreira p21

MATHEMATICAL TECHNIQUES

Induction motor parameter estimation algorithm using spectral analysis. H. Chai and P.P. Acarnley p165
Numerical feeding algorithms for asynchronous motors with impressed armature current. C. Attaianese, E. Pagano and M. Scarano p44
Passive input current waveshaping method for three-phase diode rectifiers. A.R. Prasad, P.D. Ziogas and S. Manias p512

MODULATION

Analysis, design and implementation of the space-vector modulator for forced-commutated cycloconvertors. L. Huber, D. Borojević and N. Burány p103

MOTORS

'TORUS': A slotless, toroidal-stator, permanent-magnet generator. E. Spooner and B.J. Chalmers p497
Interturn voltages in machine windings evaluated from on-site test results and computer simulation. K.J. Cornick, J.L. Guardado and P. Bekaert p238

New technique for reducing cogging torque in a class of brushless DC motors. B. Ackermann, J.H.H. Janssen, R. Sottek and R.I. van Steen p315
Numerical feeding algorithms for asynchronous motors with impressed armature current. C. Attaianese, E. Pagano and M. Scarano p44
Practical considerations in the optimisation of induction motor design. C. Singh and D. Sarkar p365
Use of canned rotors in high-field permanent magnet machines. K.J. Binns, M.S.N. Al-Din and P.J.G. Lisboa p471

NOISE AND INTERFERENCE

Spread spectrum switching: low noise modulation technique for PWM inverter drives. J.T. Boys and P.G. Handley p252

OPTIMISATION

Computer-based optimisation techniques for mass transit railway signalling design. D.C. Gill and C.J. Goodman p261

PICTURE PROCESSING AND PATTERN RECOGNITION

Pattern recognition applied to transient stability analysis of power systems with modelling including voltage and speed regulation. G. Garcia, J. Bernussou and M. Berbiche p321

POWER ELECTRONICS

Class-D zero-voltage-switching inverter with only one shunt capacitor. M.K. Kazimierczuk and W. Szaraniec p449
Constant frequency, two-stage quasiresonant convertor. K.W.E. Cheng and P.D. Evans p227
Investigations on turn-off effects in fast-recovery power diodes by modelling and simulation. S. Winternheimer and B. Laska p55
New ZVS-PWM inverter switching limits and operating area. M. Metz, J. Roux, S. Ben Doua, J.P. Arches and H. Foch p86
New approach for the analysis of a three-phase induction motor of different ratings connected to a single-phase supply. M.H. El-Maghraby, R.H. Thejel and M.M. Ibrahim p145
Power supply and protection system for plasma stabilisation in the ASDEX Upgrade tokamak. A. Wieczorek, M. Blaumoser, R. Fink, J. Oswald, J. Schwarz and K.H. Vögtle p131
Resolution corrected modulation: the practical realisation of ideal PWM waveforms. P.G. Handley and J.T. Boys p402
Spread spectrum switching: low noise modulation technique for PWM inverter drives. J.T. Boys and P.G. Handley p252
Steady-state analysis and performance of a saturable reactor assisted soft-switching DC–DC convertor. S. Hamada and M. Nakaoka p281
Synthesis of phase-modulated resonant DC/AC inverters and DC/DC convertors. M.K. Kazimierczuk p387
Waveform distortion and distortion power. S.Q. Sun and Q.R. Xiang p303

POWER SYSTEMS AND PLANT

Minimisation of unbalanced and reactive currents in three-phase asymmetrical circuits with nonsinusoidal voltage. L.S. Czarnecki p347

PULSE-CODE MODULATION

Practical real-time PWM modulators: an assessment. P.G. Handley and J.T. Boys p96

RAILWAY ELECTRIFICATION AND TRANSPORTATION

Computer-based optimisation techniques for mass transit railway signalling design. D.C. Gill and C.J. Goodman p261
Correspondence: Unbalance and harmonic studies for the channel tunnel railway system. O. Hamoud p418
Fixed-voltage thyristor convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p209
Network switching and voltage evaluation using an expert system in AC railway systems. C.S. Chang, T.T. Chan and K.K. Lee p1
Variable-voltage diode convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p197

RELUCTANCE MOTORS

Influence of number of poles per phase in switched reluctance motors. H.C. Lovatt and J.M. Stephenson p307

SEMICONDUCTOR DEVICES AND MATERIALS

Investigations on turn-off effects in fast-recovery power diodes by modelling and simulation. S. Winternheimer and B. Laska p55
New thyristor assisted diverter switch for on load transformer tap changers. G.H. Cooke and K.T. Williams p507

SIGNAL PROCESSING

Application of EKF to parameter and state estimation of pmsm drive. L. Salvatore and S. Stasi p155

SIMULATION

Cathodic protection of extended buried conductor networks: a new design method. F. Tosato and S. Quaia p443
High-performance speed controller for voltage-source inverter-fed induction motor drives. C.M. Liaw and C.W. Tseng p220

STABILITY

Pattern recognition applied to transient stability analysis of power systems with modelling including voltage and speed regulation. G. Garcia, J. Bernussou and M. Berbiche p321

STEPPING MOTORS

Analysis of current waveforms in permanent-magnet synchronous/stepping motors and synthesis of a stabilising signal. I.E.D. Pickup, A.P. Russell and Y.-S. Kwon p534
Analysis of frequency- and amplitude-modulation in the stabilisation of permanent-magnet synchronous/stepping motors. I.E.D. Pickup and A.P. Russell p336
Force-displacement characteristics of linear stepping motors. T. Yokozuka and E. Baba p37

SWITCHES AND SWITCHING THEORY

Dynamic characteristics of the class E DC/DC convertor using sampled-data modelling. A.J. Forsyth, S.H. Ma and Y.T. Leung p409
Network switching and voltage evaluation using an expert system in AC railway systems. C.S. Chang, T.T. Chan and K.K. Lee p1
New ZVS-PWM inverter switching limits and operating area. M. Metz, J. Roux, S. Ben Doua, J.P. Arches and H. Foch p86
New thyristor assisted diverter switch for on load transformer tap changers. G.H. Cooke and K.T. Williams p507
Resolution corrected modulation: the practical realisation of ideal PWM waveforms. P.G. Handley and J.T. Boys p402

SYNCHRONOUS MOTORS

Analysis of current waveforms in permanent-magnet synchronous/stepping motors and synthesis of a stabilising signal. I.E.D. Pickup, A.P. Russell and Y.-S. Kwon p534
Analysis of frequency- and amplitude-modulation in the stabilisation of permanent-magnet synchronous/stepping motors. I.E.D. Pickup and A.P. Russell p336
Comparison of two control strategies in development of high-torque electronically commutated drive. T.S. Low, K.W. Lim, M.F. Rahman and K.J. Binns p26
Influence of saturation in brushless permanent-magnet motor drives. B.J. Chalmers p51
Theoretical aspects of control of synchronous reluctance machines. R.E. Betz p355

SYSTEM PROTECTION

Network switching and voltage evaluation using an expert system in AC railway systems. C.S. Chang, T.T. Chan and K.K. Lee p1

THYRISTORS

Fixed-voltage thyristor convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p209
Influence of gate drive and anode circuit conditions on the turn-off performance of GTO thyristors. C.M. Johnson and P.R. Palmer p62
Thyristor-driven pulsers for multikilowatt average power lasers. H.M. Von Bergmann and P.H. Swart p123

TRANSFORMERS

Fixed-voltage thyristor convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p209
Passive input current waveshaping method for three-phase diode rectifiers. A.R. Prasad, P.D. Ziogas and S. Manias p512
Variable-voltage diode convertor rolling-stock transformers to control DC traction motors. D.J. Marsden p197

TRANSIENTS

Interturn voltages in machine windings evaluated from on-site test results and computer simulation. K.J. Cornick, J.L. Guardado and P. Bekaert p238
New model for single-unit representation of induction motor loads, including skin effect, for power system transient stability studies. M. Akbaba and S.Q. Fakhro p521
